

ATOMIUS SOWAN

Resilient, Always-on Networks Built On
Intelligent Next-gen Foundations

ATOMIUS SOWAN

ATOMIUS delivers advanced, fast, always on SD-WAN technology, seamless connectivity, reliable failover, cost effective bandwidth management, improved performance and cost savings. ATOMIUS ensures your teams, your apps and your business work at optimal digital productivity.

ATOMIUS SDWAN is not only the essential foundational connectivity for, it is the connectivity foundation of the advanced, affordable and scalable OMNIA connection & protection solution. Never pay for SD-WAN again as ATOMIUS SDWAN comes as standard with every OMNIA solution.

A Brief Description

- Pure-play ATOMIUS SDWAN developed by ATOMNIA
- Number of connections are only limited by hardware
- Packet-based dynamic traffic steering
- Best performing solution using Starlink & 4G simultaneously
- Maintains voice and video sessions during outage
- Capable of using 4G as a main connection
- Sub-second failover, the fastest in the industry
- Includes an inbuilt stateful packet firewall

What It Means To Your Business

- No more SD-WAN license tiers – every site has up to 1Gbps SD-WAN capacity for the same price that many SD-WAN vendors offer their 20mbps or 50mbps licenses
- You can move licenses between different sites and increase or decrease the number of sites you have without penalty
- Available in 3 different services – LITE, BIZ, and PRO to suit businesses of all sizes
- Lower costs – available on a month-by-month or fixed-term zero-install option
- Your network is securely locked down by the stateful firewall

ATOMIUS SDWAN

ATOMIUS pure-play SD-WAN is specifically designed to intelligently and dynamically keep your business continually connected, using all available connectivity options simultaneously

Power Your Business with Atomius SDWAN:

Affordable, Intelligent Network Technology
