

Full Security Frameworks Provided On The Edge,
In The Cloud Or On Prem

INTEGRATED SASE

World-class full security framework provided on the edge, in the Cloud or on Prem using best-of-breed vendors, using the only security vendor with a near-perfect 99.8% block rate for malware, as well as a 100% phishing and malicious URL and Zero-Day threats prevention rate.

SASE integration enables you to leverage a robust SASE framework for comprehensive cyber protection of your business operations, delivering enhanced security, peace of mind and compliance.

A Brief Description

- Full SASE frameworks — multiple security products in one
- Firewall-As-A-Service
- Cloud Access Security Broker (CASB)
- Secure Web Gateway (SWG)
- Zero Trust Network Access (ZTNA)

What It Means For Your Business

- Security served on the same device as your SD-WAN or from the Cloud
- SASE Gateways are built in your own country meaning your traffic does not leave your borders to be secured in traditional security vendor Clouds
- In-Country Private Gateways can be built for the exclusive use of large companies or Government departments
- Uses only products from leading security vendors, including the only vendor with a 100% malware block record and 100% success rate in blocking the biggest zero-day threats in recent years, Log4j and MOVEit

INTEGRATED SASE

Our security frameworks allow you to strengthen your network and worker protection, consolidate solutions and simplify management.

Complete, Advanced Cybersecurity Frameworks

Scalable solutions for businesses of all sizes and across every industry

Stay head of evolving threats with intelligent protection:

- Advanced security framework (SASE) built for cloud-era businesses
- Protection against sophisticated cyber criminals targeting SMEs
- Purpose-built security gateways located in-country
- Ensures your data stays protected and sovereign
- The only cybersecurity product independently proven to provide 100% malware & Zero-Day threat block rate.

Secure work from anywhere:

- Protect employees whether in office, at home or traveling
- Safe access to business apps and data from any device
- Comprehensive security that moves with your team
- Real-time threat protection and monitoring

Business benefits:

- Lower total cost than multiple security solutions
- Reduced complexity and management overhead
- Enhanced protection against evolving threats
- Supports secure digital transformation

Simplified Security Management:

- ✓ Single unified platform for all security needs
- ✓ Reduces IT team workload
- ✓ 24/7 expert management and support
- ✓ Future-proof protection that grows with you
