

Restaurant SD-WAN

Transform Your Guest Dining Experience

Whether it's dine-in, take-out or delivery, customers increasingly expect a rich digital dining experience. From online reviews and reservation services to guest wi-fi and back of house operations, technology is driving efficiency for successful restaurant businesses.

As your restaurant relies more and more on technology, internet outages can have a devastating impact on your business.

Restaurant Connectivity Requirements

- Continuous Access for Digital Orders and Payments.
- Seamless Front and Back of House Operations.
- Support Rich Digital Dining Experiences.
- Control IT Expenses and Bandwidth Costs.

What restaurants need is a simple, reliable connectivity solution that delivers unbreakable internet access with minimal on-site IT skill required.

A Simple, Cost-Effective Solution

Adaptiv Restaurant SD-WAN provides a robust connectivity solution that's easy to buy, easy to deploy, and easy to own. Our solution creates unbreakable access that keeps you connected to online ordering and digital payment systems while delivering superior quality voice and video calls and business software applications. Best of all, it's remotely monitored and managed, so you can focus on your guests instead of your network.

Advantages for Restaurants

Always on Connections

If you're not connected, you're losing money. You need a resilient network that always stays connected.

Our best-of-breed failover seamlessly keeps voice, cloud and payment systems online.

Fast & Secure Payments

Cardholder information must be protected, and guest wait times should be minimized.

We provide PCI compliant solutions that combine speed and security to accelerate payments while keeping guest data secure.

Digital Dining Experiences

Guests expect a more connected dining experience that often includes wifi access for streaming and social media.

We'll ensure you have plenty of bandwidth to power your business operations and all those guest wifi gadgets.

Guaranteed Call Quality

Calls with customers, staff and suppliers are mission-critical. You need a connectivity solution that ensures call quality and reliability.

Our solution ensures crystal clear voice quality with no dropped calls on link failover.

No On-site IT Required

Restaurants are simply too busy to deal with network complexity, they need a worry-free solution.

Our solution is fully automated and remotely managed by certified IT pros.

Grows With Your Business

When you're ready to expand, you need a network that's built to grow with you.

Our solution makes it easy to add new locations or increase bandwidth to your existing restaurants.
