

FOR IMMEDIATE RELEASE: 28th October 2022

SINGAPORE-BASED IPDC SOLUTIONS INVEST IN LEADING UK/EU SDWAN SOLUTIONS, LAUNCHING ASIA-FIRST INNOVATIVE NETWORK & CYBER SECURITY PRODUCT

- 1,684 cyberattacks per APAC organisation per week 25% YoY increase
- 72% of breaches blamed on skills gap with largest security workforce gap in APAC at 1.42M
- 86% of Asian business leaders see insider attacks as biggest risk and actively seeking ZTNA
 - 41.5% of Asian businesses devising SASE adoption strategies by end of 2022
 - 68% of APAC businesses who suffered ransomware attacks tried to keep it secret
 - 61% of APAC businesses expect cybersecurity budgets to increase in 2023

IDPC Solutions, one of the leading cybersecurity MSSPs in Asia, today announced its partnership and investment in London and Brussels based www.sdwan-solutions.global to launch **SDWAN Solutions Asia**, headquartered in Singapore.

To commemorate the partnership, SDWAN Solutions Asia will launch a world-first network and cybersecurity product innovation, **SASE SELECT** [for ISPs and enterprises], demonstrating a determined Asia-first strategy, at the TELCOMS WORLD ASIA Digital Transformation for Telcos event in Bangkok 2nd and 3rd November 2022. SASE SELECT will then be rolled out globally in 2023.

PL Tan, Co-founder of IPDC Solutions said of the investment and product launch. "As experienced cybersecurity providers in a leading managed service provider across Asia, we always innovate and strive to provide unique and tailor-made network and security solutions to suit the individual requirements of customers, making cybersecurity services affordable for all. Having worked with the founders of SDWAN Solutions since 2008 and personally witnessed their growth as a business since 2018, I believe they are the obvious and only choice for investment and partnership to take the business to Asia as **SDWAN Solutions Asia**."

Anthony Senter, CEO of SDWAN Solutions said. "There is a global cybersecurity skills gap, 1.4 million in Asia alone, by bringing our sixth world-first innovation SASE SELECT to very heart of Asia we are not only putting affordable solutions to all sized businesses, but also transferring much-needed skills to ISPs, MSPs, the channel and to enterprises directly."

Toby Sturridge, CTO at SDWAN Solutions added. "By partnering with leading MSSP IPDC Solutions, we will operate as an Asian owned, managed and staffed business. It's the perfect mix of SDWAN Solutions' unique skills and knowledge as the only company on the planet with 2 MEF double accredited SD-WAN Subject Matter Experts, and IPDC's all-encompassing APAC experience and insights, we will be able to deliver on our joint mission of delivering affordable network and security solutions to everybody."

Both SDWAN Solutions [CEO, CTO and Global Head of Channel] and an IPDC Solutions Team are available to talk to potential customers and attendees at the TELECOMS WORLD ASIA event.

More details and specifications on **SASE SELECT** <https://www.sdwansolutions.global/solutions/sase-select/>

SASE SELECT: Every SASE SELECT solution is different. Each solution is created individually to solve specific network, security and business requirements that an enterprise or an ISP (and their customers) may have. SASE SELECT provides the latest technologies, innovations and integrations to deliver what customers need, where standard solutions alone cannot. Only available from SDWAN Solutions Global – trusted experts in all things SD-WAN and SASE.

SDWAN Solutions is a Managed Service Provider (MSP) and System Integrator (SI), backed by some of the largest solution providers in the world and has a global reach across 190 countries. With a 100% focus on all things SD-WAN and SASE, SDWAN Solutions are recognised and trusted thought-leaders and the only company on the planet with 2 MEF (double) accredited SD-WAN Subject Matter Experts. Their unique innovations have beat Google, Juniper, HPE and Cisco to market.

IPDC Solutions is one of Asia's leading Managed Security Service Providers (MSSP), serving Tier-1 carriers and partners in Hong Kong, Singapore, Malaysia, Indonesia, Philippines, Cambodia, Brunei, Taiwan and beyond. They design and develop affordable solutions that enable Telcos, ISPs, IDCs, and internet providers to secure and protect their infrastructure at affordable cost, while making it possible for them to generate new revenue streams for their businesses.
