

OMNIA

The affordable All-In-One IT Solution tailored to deliver the essential products and services your business needs to thrive

Advanced * Affordable * Agile

OMNIA is the comprehensive, all-in-one platform designed to provide businesses of all sizes with lightning-fast, secure, and scalable network solutions. Our modular approach ensures that you get the perfect fit for your unique requirements and budget, whether you need the complete OMNIA suite or seamlessly integrated individual components. With OMNIA, you'll not only meet but exceed the demands of your digital operations, both now and in the future, thanks to our industry unique re-tech promise.

Safeguard your data, protect your teams, and defend your business against ever-evolving cyber threats, while simultaneously driving productivity, efficiency, and competitive edge. OMNIA's cutting-edge technologies, including SD-WAN, SASE, Zero Trust Remote Access, and XDR, work in harmony to provide unparalleled performance, security, and flexibility. Our expert team is dedicated to supporting your success every step of the way, from initial consultation and implementation to ongoing management and support.

The latest SD-WAN technology keeps you connected

SASE security integration keeps you protected

Flexible solution with modular components

Fully managed and supported 24 x 7 for you

Monthly PAYG or supplied As-A-Service

Delivering real business benefits from day 1

With OMNIA, you get world-class technology, robust security, and expert guidance – all at an unbeatable price point.

Unrivalled Excellence in Network, Security, and Data Solutions

- Most advanced solution in its class, using best-in-breed technology vendors
- Trusted ecosystem tech partners: Check Point, Console Connect & Thales
- Multi-layered cyber protection with SASE frameworks, ZTNA & L4 Encryption
- Expert support team to manage OMNIA and upskill your in-house staff
- Fully managed for you or co-managed with you - we are with you every step

Budget-Friendly Flexibility and Scalability with OMNIA

- No minimum term commitment option and flexible scaling
- Affordable for businesses of all sizes, even with the latest technologies
- Cost-effective 1Gbps licence for efficient bandwidth utilisation
- Streamlined IT operations, reducing time, costs, and complexity
- Eco-friendly and efficient one-box solution with seamless deployment

OMNIA offers unparalleled flexibility and scalability, tailored to your business needs and budget, while simplifying IT management and reducing environmental impact.

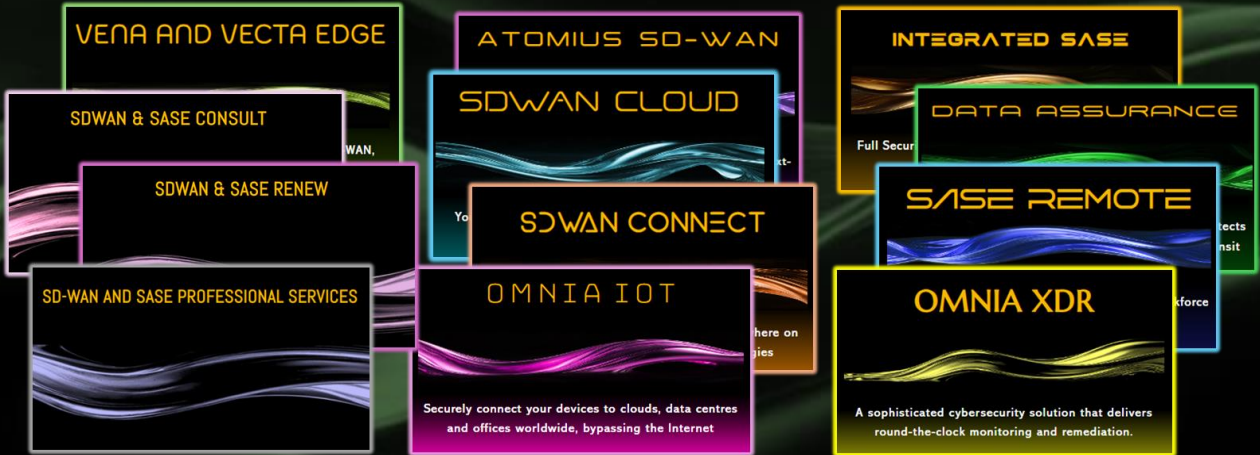

What will your OMNIA look like?

Professional services

Connection modules

Protection Modules

At SDWAN Solutions we understand that every business has unique needs and priorities when it comes to their network infrastructure. That's why we've designed OMNIA as a flexible, modular solution that can be tailored to suit your specific requirements. Whether you're looking to start with our high-performance Atomius SD-WAN and add security and Data Assurance components later or implement the fullest suite of OMNIA modules from the outset, we're here to guide and support you every step of the way.

Select your required OMNIA modules & services

Hardware device

- One device to run network, security & L4 encryption
- Acts as a WI-FI Access Point.
- Has a built-in SIM slot for 4G failover.
- Saves capital investment, slashes device management charges and reduces power consumption and costs

Professional Services

- RFI / RFP process management
- Research and Development Laboratory Services
- Proof of Concept and Pilot Programmes
- Solution design and implementation
- SD-WAN and SASE Consultation services
- Training on specific vendor technologies

- Project Management
- Solution Recovery of existing projects
- Orchestrator-as-a-Service
- Deployment-as-a-Service in 190 countries
- Engineer-as-a-Service in 190 countries
- Market comparison to assist your decision

SD-WAN software

Fastest per packet failover ensures you stay connected

- No more SD-WAN license tiers – every site has up to 1Gbps SD-WAN capacity for the same price that most SD-WAN vendors offer their 20mbps or 50mbps licenses
- You can move licenses between different sites and can add or remove sites without penalty
- Mix and match 3 different services – LITE, BIZ, and PRO to suit businesses of all sizes

Multi-Cloud Access

Connect to every Cloud provider seamlessly

- SDWAN CLOUD becomes a site on your existing network & acts as a gateway to every IAAS and SAAS provider instance
- Connection to over 900 data centres internationally.
- Consumption-based billing model – monthly commit or PAYU model.
- Spin up or spin down connections in minutes.

Connectivity

Resilient connections to anywhere on the planet

- Ethernet
- MPLS
- 4G / 5G / LTE
- Dedicated Internet Access
- Broadband
- FTTC / FTTH / FTTP
- LEO Satellite (including Starlink)

Secure IoT connection

- **96% of IoT devices are un-secured – are yours?**
- Securely connect your **IOT devices** to your network
- Connect back to any location **bypassing** the public Internet
- **Reduce the threat** of cyber-attacks on IOT devices
- Use OMNIA IOT to build a secure payment network for POS units

Cyber Security

Security frameworks from proven top security vendors

- ZTNA – **Zero Trust** Network Access
- SWG – **Secure Web** Gateway
- **Firewall-As-A-Service**
- CASB – **Cloud Access** Security Broker
- Endpoint protection

L4 Data encryption

Make your data worthless and protect your reputation

- Layers 2,3 and 4 **data assurance** encryption
- Operates independently of applications & the network
- Enables data assurance, including when **data is in motion**
- **Protects** against double extortion **ransomware**
- Protects **data** North to South (WAN) & East to West (LAN)
- Your data becomes worthless if compromised

ZTRA Remote Access

- SASE REMOTE is **deviceless** – the form factor is a downloadable client which sits directly on staff laptops
- SASE REMOTE uses multiple connections simultaneously (Wi-Fi, 4G, broadband) with **sub-second failover**
- **True ZTNA** secure access with no VPN concentrator to manage or purchase
- **End-to-end** secure solution protects users, your data and your network when your staff are working outside of the office – with full compliance logging

Extended Detection and Response

- Integrates data from OMNIA SASE as well as Atomius
- SD-WAN devices
- **Easily extended** to include endpoints, networks, cloud environments, and LAN devices
- Ensures **proactive risk management** and mitigation across your entire digital landscape
- **Enhance** your cybersecurity defences with predictive intelligence.

Discover the Power of OMNIA for yourself

One of the key advantages of our Atomius SD-WAN is its unbeatable value for money. With a single licence tier covering up to 1Gbps throughput, you are not restricted to 20mbps or 50mbps bandwidth as you are with many other SD-WAN vendors' licences sold at higher price points. Atomius is also up to 10 times more cost-effective than other solutions at 1Gbps throughput level and outperforms most in speed and functionality.

We believe in transparency and putting you in control of your IT journey. That's why we invite you to request a quote via the form on our [OMNIA webpage](#). Our knowledgeable team will typically respond within 24 hours with a budgetary figure, giving you a clear picture of the investment required. We don't believe in pushy sales tactics – instead, we focus on building long-term relationships based on trust, expertise, and delivering genuine value to your business.

With OMNIA, you can rest assured that you're getting a best-in-class solution that is tailored to your needs, backed by a team of experts who are committed to your success. So why not take the first step today and request a quote? We're confident that once you experience the power and flexibility of OMNIA, you'll wonder how you ever managed without it.
